

Chronic Care Pharmacy-at-Home™

An Integrated Solution For Homecare Homebase Users

ExactCare provides comprehensive medication management for complex, chronic patients. Now, **Homecare Homebase users** can provide patients seamless access to this support.

The Program

Home-Based Patient Support

- In-home medication assessment
- Collection of basic patient health info
- Prescriber outreach to communicate pharmacy transition

Ongoing Clinical Pharmacy Services

- ExactCare Clinical Assessment™ for all new patients
- Medication reconciliation with all prescribers
- Medication synchronization
- Monthly review of complete medication profile
- Updated medication profiles shared with providers

Patient Adherence Tools

- ExactPack® multi-dose adherence packaging
- Home delivery
- Electronic medication reminders
- MyECP® mobile app

Note: There is no additional charge to patients. Pharmacy copayments remain in place.

The Outcomes

In 2018, **50%** of clinical recommendations identified by ExactCare **addressed drug duplications and gaps in drug therapy.**

Nearly **40% fewer readmissions** for patients on ExactCare service.

94% of patients say ExactCare makes it **easier to take their medications.**

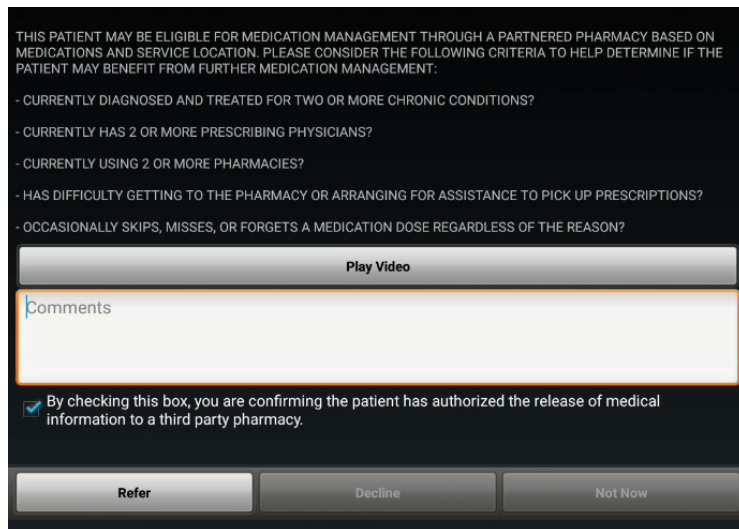

89% of patients say ExactCare helps them **better manage their health.**

The Integrated Homecare Homebase Solution

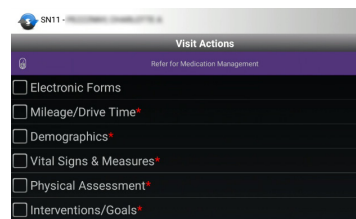

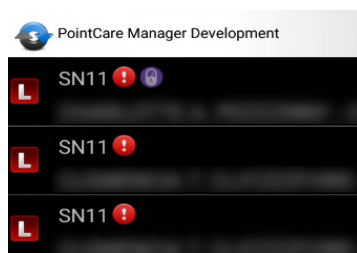

Patient identification and referrals are quick and easy as an added feature in Homecare Homebase.

- The ability to assess a patient’s fit for the ExactCare program at the point of care.
- Integrated referral process seamlessly sends patient info directly to ExactCare.
- Referral capabilities at start of care visit and upon subsequent visits.
- HL7 interface to securely transfer data to ExactCare.
- Robust data transfer capabilities for patient demographics, physicians, contacts and medications.
- ExactCare Pharmacy note type within Coordination Notes to communicate updates.
- Patient consent captured in the system.

Referral prompt screen will appear when **5 or more medications** are entered into the PointCare device.

In this screen, clinicians can play a **short ExactCare video** explaining the program and select **“Refer,” “Decline,” or “Not Now”** depending on the patient’s interest.

Reminders are created in the visit list and visit actions screens when the **“Not Now” button is selected.**

Getting Started With ExactCare

ExactCare clients receive support from a dedicated implementation team; customized outreach and engagement strategies; training and education for your team; and regular reporting on progress.
